

Worksheet 4f – Basic Components

Design a Mobile Profile Page

Imagine you are developing a mobile profile page using Ionic-React. Design a layout that includes the following elements:

1. User's profile picture (use an Ionic card for styling).
2. User's name and a brief bio.
3. A list of favourite hobbies displayed as Ionic buttons.
4. A responsive grid for showcasing the user's photo gallery (at least three photos).
5. Ensure that the layout is visually appealing and responsive. Utilize appropriate Ionic components for buttons, cards, and responsive grid.

Example:
